

Titan Electric

DANA HOTEL AND SPA

Titan Electric completed all the electrical and low-voltage work at the Dana Hotel and Spa, a luxury hotel located at the corner of State and Erie in River North Chicago.

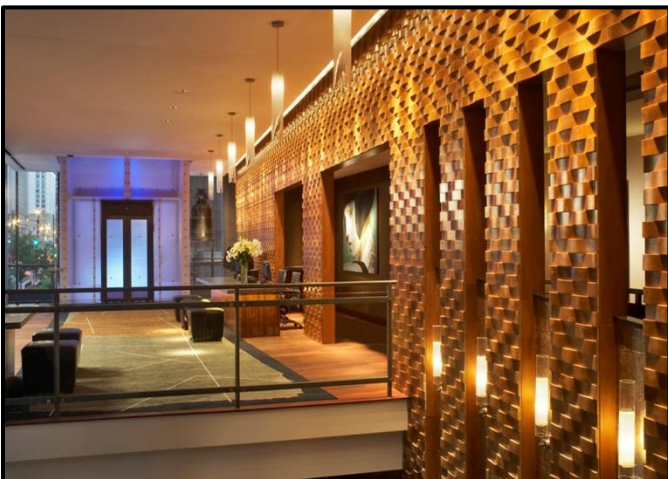

The ground up project was originally intended to be an historical renovation, but was eventually deemed to be structurally unfeasible for preservation. The 26-story, 150,000 square foot hotel, has 216 guest rooms, including 22 luxury suites.

A stunning exterior 28-foot clear glass curtain wall offers passersby views of inside the hotel. The striking ground floor entrance is anchored by a timber wall, providing a backdrop for a two-story fireplace, a Japanese steakhouse and sake lounge, and a signature “floating” sushi bar. Other features include a 4,100 square foot indoor/outdoor rooftop bar and a full-floor, full service luxury spa and fitness center.

Titan Electric’s involvement included:

- Power distribution
- 300 kw generator
- Complete power and lighting system
- Lighting control system
- Emergency distribution and building security system
- Programmed and building-certified fire alarm system
- Hotel sound systems
- New CCTV system
- Complete voice/data installation
- Wireless high-speed internet

Bovis Lend Lease was the general contractor for the project with architectural services provided by Eckenhoff Saunders Architects.

POWERING THE FUTURE
