

# Titan Electric

## NEW LENOX POLICE DEPARTMENT

Titan Electric was the electrical subcontractor for the New Lenox (IL) Police Department's new 34,994 square-foot headquarters facility.

The building is part of a comprehensive 10-acre site development that involved new shared onsite and offsite detention areas, major access road construction, improved parking for 100 cars, and the relocation and reconfiguration of the existing utility systems infrastructure.

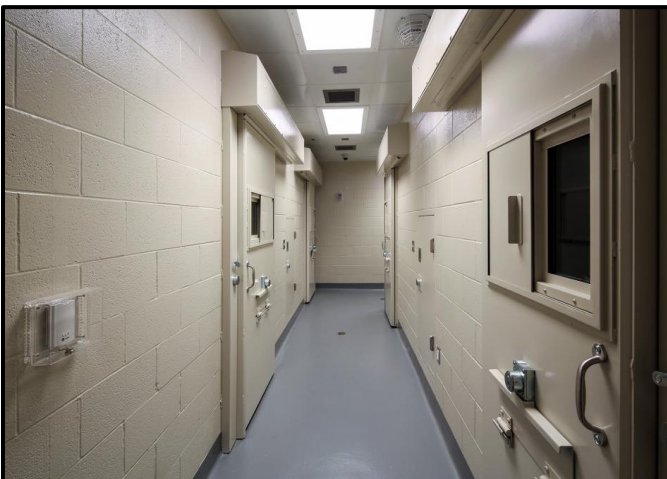

Major features of the project include:

- A 40-occupant state-of-the-art multipurpose/training room with full multimedia capabilities
- High-density records storage; evidence storage; community room; and staff areas for code enforcement, investigations and command staff
- Upgraded detention facilities including an enclosed secure sally port, a detention block, a DUI processing area, interview rooms, a holding area, and separate juvenile detention facilities.

The Village of New Lenox instituted a directive for this project that specifically implemented the use of local contractors and residents by a specialized contractor procurement system that involved local firm outreach, company and worker job fairs, and a contractor-mentoring program to ensure maximum positive local economic impact.

Leopardo Construction was the general contractor for the project with architectural services provided by FGM Architects.

*POWERING THE FUTURE*
