

Titan Electric

CHICAGO SPORTS DEPOT

Titan Electric completed extensive electrical work at Chicago Sports Depot's new two-story, 14,000 square foot retail facility. The building received the Award of Merit for Best Retail / Mixed-Use Project from ENR Midwest.

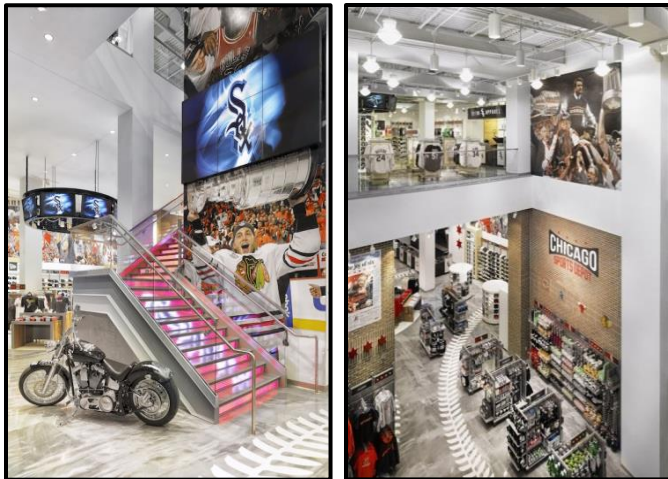

The store is located at Chicago's U.S. Cellular Field, home to baseball's Chicago White Sox, and features branded-merchandise from the White Sox, Bulls, Bears, Blackhawks and Cubs, as well as several area colleges and universities.

Reproductions of front-page newspaper stories were incorporated onto the walls to recreate local excitement of past championships. The attention to detail extends throughout the store, including the bathroom where a catcher's mask light fixture is installed.

Titan's involvement included:

- Installation of all wiring and lighting for the facility's full-motion LED video staircase. The staircase, billed as the first one of its kind in the U.S, contains approximately 15,000 LED lights and displays sports-related video feed, images and team logos
- Installation of all wiring for 77 video monitors on 4 video walls. Monitors are positioned throughout the space and play continuous video feed from action on the field and other live events around the country

McHugh Construction was the general contractor for the project with architectural services provided by 360 Architects and RGLA Solutions Inc.

POWERING THE FUTURE
