## JONES DAY LAW FIRM

Titan Electric's Electrical and Low-Voltage divisions finished a 22,000 square-foot renovation for the Jones Day Law Firm at its downtown Chicago location on Wacker Drive.

The executive conference floor was completely transformed by upgrades to the HVAC, electrical and cabling infrastructure, as well as major changes to 15 meeting rooms, 5 administrative offices and a café/break room. Each meeting room was outfitted with a new plasma TV and video conferencing capabilities.

Jones Day needed to utilize the space throughout the renovation, so construction was completed in multiple phases over the course of 24 weeks to prevent any disruption.

Titan Electric's involvement included installation of:

- Power distribution
- Programmed and building-certified fire alarm system
- Voice/data system and Cat6 voice/data cabling
- LUTRON lighting/dimming/shade control systems
- Interfaced LUTRON System with audio visual and video conferencing systems through LUTRON RS232 ports
- Audiovisual cabling and conduit
- Speaker, paging and video conferencing systems
- Existing conference tables retrofitted with power and audio visual cabling
- Wall touch panels and 10 button control pads
- Ceiling-mounted audio speakers and video cameras
- Wireless touch panels with table top docking stations in the conference rooms

Leopardo Construction was the general contractor for the project with architectural services provided by Gensler.
