

# Titan Electric

## PERKINS+WILL

Perkins+Will, an internationally renowned architectural firm, completed a major renovation of its headquarters in downtown Chicago.

Perkins+Will decided to incorporate an extensive number of sustainable design strategies in this remodel and were able to achieve LEED Platinum Certification for the project, the most prestigious certification level available from the U.S. Green Building Council.

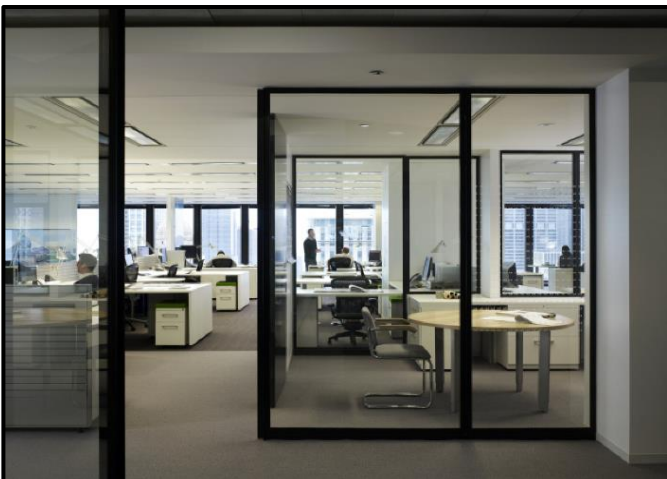

The extremely complex renovation, completed in four separate phases, totally refurbished Perkins+Will's offices, occupying 66,000 square feet on the 35<sup>th</sup> and 36<sup>th</sup> floors of the historic Mies van der Rohe building at 330 N. Wabash.

Titan Electric was an integral part of the project, providing a complete electrical upgrade of the facility's lighting and power infrastructure.

Some of the items provided by Titan were:

- Power distribution
- Branch circuits and wiring devices
- Design build lighting system
- Energy efficient light fixtures
- Lutron Lighting Control System
- Building certified fire alarm system

Pepper Construction was the general contractor for the project with architectural services provided by Perkins+Will.
