

Titan Electric

HOLIDAY INN EXPRESS & SUITES

Titan Electric completed the design-build Holiday Inn Express & Suites Chicago West - O'Hare Airport Area hotel project near Chicago's O'Hare International Airport in Hillside, IL.

This 5-story hotel features 135 rooms, 25 executive suites, numerous meeting rooms, a breakfast buffet area, a health and fitness center, a heated pool with Jacuzzi, and a business center. All rooms include microwave, mini refrigerator, 32" flat panel HDTV and free high-speed wireless internet access.

Titan was not only responsible for power distribution, but also installed the entire Low Voltage system including sound, fire alarm, security, and telecommunications. Due to IHG's firm completion date, this was a fast-track project and Titan finished its total Scope of Work on time.

Services implemented by Titan Electric included:

- Power distribution and emergency distribution system
- Complete power and lighting system
- Programmed and building-certified fire alarm system
- Voice/data system
- Building security system
- Hotel sound system
- CATV throughout
- Area of Rescue system
- Wireless high-speed internet
- CCTV system

General contracting services were provided by Stevens Construction Corp. and architectural services were provided by Architectural Design Consultants.

POWERING THE FUTURE
