

Titan Electric

BRAINTREE

Titan Electric was recently chosen as the electrical subcontractor for Braintree's new 65,000 square-foot office headquarters on the 8th floor of the iconic Merchandise Mart building in Chicago's River North area.

Braintree joins a growing digital technology community at the Merchandise Mart, including such industry leaders as Motorola Mobility, Yelp Inc. and Allscripts - all of whom selected Titan Electric to be their electrical subcontractor.

Braintree designed an extremely unique environment for its staff to encourage collaboration and creativity. All employees work in an open floor plan that allows for easy interaction and teamwork. The layout includes several Hoteling Office spaces for private phone calls or meetings, and Collaborative Rooms for smaller groups. Other features include whiteboard walls throughout, and garage doors for opened/closed spaces. A bar featuring local breweries, an open-spaced kitchen/gaming room, and ping pong tables keep with the collaborative theme.

Services installed and implemented by Titan included:

- 40kw UPS for upgraded power backup of critical systems in the MDF and two IDF rooms, including transformers and electrical panels
- Dimming system with ceiling and wall sensors
- Light fixtures including cloud fixtures in the atrium
- Power wiring for 301 new workstations
- Raceways for tele/data
- Upgraded security and audio visual components
- Complete fire alarm system upgrade

Skender Construction was the general contractor for the project with architectural services provided by Partners by Design.

POWERING THE FUTURE
