

Titan Electric

BENET ACADEMY SCIENCE WING

Benet Academy is one of the leading college-preparatory schools in the State of Illinois. Located in Lisle, IL, the average ACT test scores regularly exceed state and national averages, and more than 99 percent of students go on to college after graduation.

Titan Electric completed both an upgrade of the electric distribution across the campus, and the installation of all electric services for Benet's new science wing and student activity center.

The new \$16 million, 50,000 square foot facility includes extra corridors to ease hall traffic, a larger cafeteria and additional storage space. It also houses four combination classrooms and laboratories for biology and earth science classes, three chemistry classrooms and two chemistry labs.

Executive Construction, Inc. was the general contractor for the project with architectural services provided by Bedar, Dwyer and Behm Cashman Stahler.

POWERING THE FUTURE
