

Titan Electric

CRATE & BARREL

Titan Electric completed construction of a new two-story Crate & Barrel store at Old Orchard Mall in Skokie, IL.

This project presented some unique challenges. The client asked that construction be completed two months earlier than a typical store construction schedule due to the holiday season. Additionally, the second floor post tension deck made the installation on both floors much more difficult.

Titan, however, was able to meet all deadlines to insure that the store was fully operational for the start of the holiday shopping season.

Titan's involvement included the installation of the following electrical and low-voltage services:

- Power distribution
- 5,000 feet of track lighting
- Emergency distribution system
- Programmed and building-certified fire alarm system
- Voice/data system and sound system throughout
- Building security system
- New CCTV system

POWERING THE FUTURE
